

# MEMENTO MORI

## Immersive Virtual Space

An **individual** project that explores **death education** as a means to confront the fear of mortality and rediscover the value of living. Just as we welcome new life with care, we should honor its passing with the same heart.

By translating abstract awareness into spatial and **sensory experience**, it creates an immersive virtual space where audiences are invited to reflect on impermanence, acceptance, and the quiet beauty of **life's finite nature**.
